ROCA LOVES THE PLANET

www.roca.com

At Roca we've been working on **blue ecology since 1936**. Reducing the volume of water in our tanks, making taps which save up to 50% of water and have lower CO₂ emissions, and researching new ways to protect the environment. Because our commitment to the planet goes way beyond a simple logo or good intentions, we make it happen. **We love the planet and we show it.**
