ROCA LOVES THE PLANET

www.roca.com

We reduce the water capacity of **our tanks**, we redesign **our taps**, we incorporate dual flush options, and we create devices to reduce the flow of water... We've done a lot to save water, but we still haven't done everything. Our commitment to the environment is still a constant concern and we won't rest until we find new ways to continue saving water. **We love the planet and we show it.**
